## Four arrested after they occupy Manchester tech company connected to Israel's weapons trade

Jul 1, 2024

### Images and videos which are free to use uploaded here

Four activists were arrested this afternoon after they targeted another link in Britain's chain of complicity with Israel's genocide in Gaza, as the Manchester offices of 'CDW UK' were severely disrupted by an activist blockade.

Elbit Systems, Israel's largest weapons company, are facilitated in their British presence by support from CDW's software and technology services, and so, as part of a nationwide campaign against complicity in Israeli atrocities, activists used a vehicle and lock-on device to blockade the back entrance whilst one occupied the ledge at the building's entry. Locals gathered in support of the action and drivers passing by repeatedly beeped their horns to express solidarity. The building was also sprayed with blood-red paint – to serve as a reminder to CDW of the Palestinian bloodshed from which their firm profits.

CDW provide supply chain management, IT solutions, cyber security and eProcurement services to the British operations of the Elbit brand, part of the global Israeli arms firm. CDW are contracted for IT services for 'Elbit Systems UK Ltd', headquartered in Bristol, from which Elbit oversees drone and arms production nation-wide. This is not the first time the company has been targeted, with activists spraying a site in Peterborough with red paint and shattering their windows.

This action follows on the heels of others taken to target Elbit's partners & suppliers. Last week activists occupied the GRiD Defence Systems site in High Wycombe, barricading themselves inside and proceeding to destroy hardware and unfurled banners. This came after activists destroyed dozens of boxes of GRiD processors found inside Elbit's Kent factory during an action, the total damage-caused estimated by police to be worth over £1million. GRiD manufactures a range of military computers, processors, and similar electronic equipment, either for direct battlefield use or to be integrated into other systems.

Since October 7th, over 38,000 Palestinians have been killed, more than 86,000 injured and the majority of the people in Gaza are now displaced. Elbit Systems supply the majority of Israel's military drone fleet, land based equipment, bullets, munitions and missiles. Their weaponry is often marketed as "battle-tested", after deployment against the people of Gaza. The genocide of Gaza would not be possible without Elbit's weaponry – and those firms, including CDW and GRiD, are made complicit by their facilitation of Elbit's deadly business.

CDW is not the first to be targeted. After similar actions, five other companies have ended their association with Elbit's deadly trade in the past two months. These include Elbit's weapons transporters Kuehne+Nagel, recruiters iO associates, property managers Fisher German, website designers Naked Creativity and legal firm MLL Legal.

Palestine Action will continue to target all those who allow Elbit to continue their business of genocide, until they declare they've cut all ties.

### Palestine Action target over 10 Barclays sites across the country

Sep 12, 2024

### PRESS RELEASE, 12/09/24 FOR IMMEDIATE RELEASE

### Palestine Action target over 10 Barclays sites across the country

Images and videos available for free here (More photos will be uploaded throughout the day)

Overnight, Palestine Action have targeted more than ten Barclays sites including branches, call centres and offices. The bank has been marked with symbols of their complicity in the genocide of Palestinians.

Bank premises from Edinburgh to Kent have had their windows smashed, and covered in blood-red paint, in actions which Palestine Action have vowed will continue until Barclays cease their investments in Elbit Systems – Israel's largest weapons firm, and Palestine Action's primary target. These actions follow those of June 2024, when nearly 20 branches of the arms-investing bank were smashed [1].

Confirmed targeted sites include:

- Barclays Wealth & Investment Management, 3 Hardman St, Manchester
- Barclays Bank, Royal Tunbridge Wells, TNI 2TB
- Barclays Bank, Islington, London, N1 8EH
- Barclays Bank, Whitechapel, El 1BJ
- Barclays Bank, Mayfair, W1J 8NL
- Barclays Bank, Hammersmith, W6 9HY
- Barclays Bank, Oxford, OX1 3HB
- Barclays Bank, Edinburgh, EH2 2AN
- Barclays Bank, London, E6 2HW
- Barclays Wealth & Investment Management, Edinburgh, EH3 7LU
- Barclays Centre, Liverpool, L7 9PQ

11 months into the genocide in Gaza, in which Elbit plays a central role, Barclays still holds Elbit shares. In fact, it has more than tripled its Elbit shareholdings [2]. Elbit provides 85% of Israel's military drone fleet and Iand-based equipment, as well as bombs, missiles and other weaponry [3], which it markets as "battle-tested" [4] after they are developed during bombardments in occupied Palestine. Additionally, Barclays holds over £2billion of investments, and underwrite loans worth £6billion, in other firms involved in arming Israel [5].

When Barclays last saw nationwide resistance, its CEO, CS Venkatakrishnan, claimed that the the bank is *"deeply sympathetic about the overall suffering in the region"*, but pleaded that Barclays' property ought to be protected [6]. Palestine Action state in response:

"Barclays' investments are contributing to the wholesale destruction of Gaza, the erasure of Palestinian life and property.

These banks choose to invest in manufacturers of genocide. They have evaluated that the continued returns on investment generated by Elbit Systems and Israel's war machine are worth more than the moral or political cost of dealing in war crimes.

Palestine Action will continue to take action to re-calibrate that cost-benefit analysis: reducing the profitability of any operation doing business with Israel's arms trade."

### Palestine Action blockade two Israeli weapons sites in Bristol

Nov 12, 2024 | 0 comments

### Images and videos are available for free, with the relevant credit

Today the direct action network Palestine action redoubled their efforts to shut down Elbit Systems, Israel's largest weapons company, by blockading the entrances of two sites in Bristol. The activists used lock on devices inside vans to block the gates at both sites, preventing any from entering and damaging Elbit's ability to develop death dealing weapons.

One of the sites, the facility at Filton, Bristol, is the most recent of Elbit facilities in England, the brand new £35m R&D hub of Israel's biggest weapons firm. Its June 2023 opening was attended by the UK-Israeli Ambassador Tzipi Hotevely, and Elbit's CEO Bezhalel Machlis – who has frequently boasted of the company's central role in Israel's military during the ongoing Gaza genocide.

According to Israeli media, Elbit provides up to 80% of the Israeli military's land based military equipment and 85% of its military drones. It supplies vast numbers of munitions and missiles – including the 'Iron Sting' recently developed and deployed for the first time in the 2023-2024 Genocide in Gaza, along with wide categories of surveillance technologies, targeting systems, and innumerate other armaments.

"Direct action against Elbit aims to disrupt this: targeting the source of colonial violence and genocide against the Palestinian people, undermining Elbit's profiteering from Israel's daily massacres." said a Palestine Action spokesperson.

The other site is Elbit's headquarters at Aztec West 600. This HQ is used by used by Elbit to oversee their logistical, financial, and operational affairs throughout the country, making it a key hub for Israel's arms trade in Britain. This is the latest in a seriesofactions undertaken at the site since the start of Palestine Action's campaign.

A Palestine Action spokesperson said: "Sustained direct action against Elbit disrupts the colonial violence and genocide against the Palestinian people. When our government fails to abide by their legal and moral responsibility to prevent genocide, it is the responsibility of ordinary people to take direct action to do so. We will continue to take direct action until Elbit is out of Britain."

# PALESTINE AGTION THE UNDERGROUND MANUAL

# STEP 1 Create a cell

# A CELL IS AN AUTONOMOUS GROUP TAKING ACTIONS WITHOUT DETECTION AS PART OF PALESTINE ACTION UNDERGROUND.

To build your cell, it is crucial that you only invite **TRUSTED** people to take part in it. You don't need loads of people either. Keeping the cell small, makes it more secure. <u>3-5 PEOPLE</u> is an ideal number. BUT, just one person taking action on their own is enough!

However, taking action with other trusted people, makes it safer and means you've always got back up with you.

Once you've got your cell together, come up with a name. This can be named after a Palestinian freedom fighter, a play on taking action against the war machine, or anything else that's appropriate.

Next, get a **protonmail address.** This will be key for sending in your actions, which we talk about later on in the guide. Once your cell has done its first action, and sent in the information to actions@palestineaction.org, we will then respond to you with further information, potential future targets and any other tips and tricks that we come across in the Palestine Action Underground.

\*Please refer to the technology page for more advice on protonmail and proton VPN\*

Now you've got your cell (or yourself), it's time to pick your target. Head to our website to find a list of secondary and primary targets who enable and profit from the Israeli weapons industry in Britain. Making your job to pick one a slightly easier process! Each is just as culpable as the other, and applying pressure to them is key to breaking the links which sustain Israel's arms trade.

It might be simpler to pick a target based on your locality, making it easier to plan, conduct the reccies and save some transport costs!

If you are not based in Britain, then it might take a little bit of research to find your relevant target. As Israel's weapons industry isn't content with just the destruction of Palestine, they tend to try and expand their reach to every corner of the globe.

### CHECK OUT THE NEXT PAGE TO FIND INTERNATIONAL TARGETS

A starting point for research is to make sure your using a secure browser when looking into complicity companies. Here are some key search terms to use alongside the country/city you live in:

### ELBIT SYSTEMS

If that doesn't bring any fruitful results, then you can try searching the company names of all our targets included here and see if they have a presence in your country/area.

"elbit systems" "leicester"

Some countries may have a Ministry of Defence which has made a deal to buy weapons from Elbit Systems or another Israeli weapons firm, without having a factory in the country. Targeting the Ministry of Defence offices, or any other relevant buildings associated with government making decisions, is always a possibility. It's also definitely worth looking into your country's weapons firms, or as they might call it "security and defence". Many countries have their own public and private weapons firms, who deal with the apartheid state of Israel. For example, Thales is a french weapons firm with many links to Elbit Systems.

# **STEP 3** PREPARE FOR ACTION

If picking your target didn't get you excited enough about your new venture to dismantle Israel's war machine, preparing for action definitely will.

### WHEN PREPARING FOR ACTION, KNOWING YOUR TARGET AND DOING AN EFFECTIVE RECONNAISANCE (RECCE) IS VITAL. RECCES PROVIDE KEY INFORMATION TO MAKE YOUR ACTION AS SMOOTH AND DAMAGING AS POSSIBLE.

Before we get into what infromation you need to gather, let's talk about not being obvious as f\*\*\* when you do a recce. Depending on where your target is, changes how you need to act. For example, if it's in the middle of town centre, then going for a walk with a friend or by yourself and pulling out a camera to look at the site doesn't look suspicious at all. However, if you're going out in the sticks walking around an industrial estate with a selfie stick - you'll probably stand out a bit. On going for sites in more rural areas, try asking to borrow someone's dog to take them on a walk (or walk your own dog if you've got one). You can also do a drive by, but make sure you're getting the key information you need from this.

Now, before you go heading into town centre or to walk your dog, it's always worth having a look first on google earth. After searching on google earth using a secure browser (Tor for example), and using the little yellow man to walk down the street, you'll have more of an idea of what you could potentially do on your action, and what else you need to find out from your recce. Having a brief idea of what your action could be, will help you do a recce which takes into account your actual plan. Do not just leave it to google though, as company's make changes all the time, which is not updated on google. Nothing beats going in person for the best possible preparation.

### **KEY INFORMATION TO FIND**

### PLACES TO PARK

#### Before, after and during

Before, after and during It's important to find out a car parking space which isn't monitored by CCTV or needs a parking ticket .Of course you might have got your hands on fake plates, but even still it's good to keep the vehicle undetected. Make sure it is also easy to access from where your action will be.

#### SECURITY

How many? Are they stationary or moving around? If there is security present, think about how you could potentially avoid them. If that's not possible, consider how you could still do your action.

### **INSIDE OR OUTSIDE?**

Where are they looking out onto? Which street? Times of shift change- its often better not to catch them at shift changes as there will be more staff around. Do security remain inside the compound or seek to cover entry points outside the facility?

#### CCTV

Location? How many? What is it pointing at/filming? It may be impossible to avoid doing your action whilst avoiding CCTV, that's why it is crucial to make sure you are unidentifiable as mentioned before

WHAT IS SURROUNDING THE TARGET SITE Do they have neighbours/neighbouring buildings? Do the neighbouring buildings have security?

ESTIMATED TIME OF ARRIVAL FOR POLICE

How far away is the local police stations?

#### POLICE PATROLS

Do they patrol area? During specific times? Unmarked police cars in the area? Foot patrols?

#### FENCES?

How many? Where? What type of fences? How high a ladder would be needed to get over fences?

- **BARBED WIRE?**
- How much? Where?

ACCESS POINTS to building (fire escapes etc)

#### ALARMS

Do you know what sets off the alarm? Whatever sets off the alarm should be done last.

# STEP 4 Plan your action

### TYPES OF ACTION

Now you've done your recce, it's time to nail down your plan! Creativity is vital to keep our resistance effective. When planning for your action, an important starting point is to finalise what you want to achieve. Here are just a few examples of what actions have already been taken. If your inexperiecned it's best to start simple and build your way up. Dream up crazy ideas in your cell, remember that your action is to destrupt, damage or destroy your target. Here are some suggestions and different tatics to get you started...

### **EXTINGUISH YOUR TARGET**

Fire extinguishers can be repurposed and refilled with blood-red paint, so when it's sprayed it makes a big splash and can cover a massive area within seconds - perfect for a get away action.

### SPRAY PAINT

Spray painting can be quick as well, as long as you don't try and spray an essay onto the walls of your target! Some key slogans you can use are: Shut Elbit Down, Free Palestine, Evict Elbit, War criminals

### SMASHING WINDOWS AND EXTERIOR EQUIPMENT

Smashing stuff can also be very quick to do. With an efficient sledgehammer in your hand, you can cause quite a bit of damage! Smashing windows often only takes one or two swings. But air conditioning units, cameras and other external equipment can sabotage the profits of your target even further.

### **BLOCK THEIR PIPES**

If you've managed to locate the company's external pipes (water and/or sewage), then blocking them will create a lot of disruption for your target! Concrete can be used to fill up the pipes, and when it dries, your target will be in for a messy surprise.

### BREAK IN

If you're feeling up for it, and know the site back to front, then breaking into your target and damaging the contents inside is obviously a very effective tactic.

### THINK BIG

The tactics mentioned are examples of previous actions so by all means think big! Try not limit your action based on whats been done before. Remind yourself when brainstorming different ideas, what could I do to be creative?

### HOW TO GET TO THE SITE AND LEAVE UNDETECTED

Now once you've decided what tactics you're going to use for your action, you'll need to plan how to get to the site and leave undetected. Transportation is a key part of any plan, and can be the difference between getting away with it, and getting caught. Here are some examples of different transport methods, and how you can use them to your advantage:

### FOOT

Walking to a site, or even running if you're feeling up for it, is probably one of the most covert ways of taking action. Key to this is keeping your face covered the whole time, and planning a place to go to where there are no cameras, which you can leave with normal clothing on, to head to your next destination. Remember to make sure it's a busy area, so if you are later captured on CCTV, they won't be able to tell it's the same person who did the next action.

### BIKE

For covert actions, bikes are great. A similar principle applies though as using a car. Have the bike stored somewhere close to your target, but in a place without cameras. Then go on foot from that point to do the action, then head back to your bike.

### CAR

Cars tend be the easiest way to get around. But, they do have license plates which can be picked up by cameras and traced to the owner. If you do plan on using a car, make sure you've sussed out where all the CCTV and road cameras are for the route you want to take - and find a route which avoids them completely. Do not park the car next to the site, have it at a location which isn't able to be picked up by cameras.

### ROUTE

When you decide your mode of transport, you need to make sure you have your routes planned for a perfect getaway. Think about where the cameras are, and don't walk a few hundred metres down the road and take your mask off. If the police want to trace you, they'll follow the cameras to where you took your mask off and possibly get a picture of your face. Wearing a baseball cap does still help with avoiding your face being captured on camera as well, but it's no guarantee. The best thing to do is remain covered until you are at a safe spot without cameras, and that is relatively busy. From there you can plan your route home.

### PUBLIC TRANSPORT

If you're using public transport, do not, we repeat DO NOT, use your own debit/credit card. This information is stored and can be accessed by the police very easily. It is always best to use cash. However, these days, many transport modes don't allow cash. If you're in London using an oyster card which is topped up with cash is the best way to go. Also be aware than public transport has CCTV, so keeping your face covered is ideal. Getting on the bus or train with a balaclava on might draw more suspicion though. So think of other ways to cover your face - half face coverings are very common since covid and you can wear sunglasses at night.

**CRUCIAL ELEMENTS** 

### ROLES

If there is more than one of you in the action, which is ideal, you should split up roles between you. For example, if you want one person to just focus on getting pictures and a video, then they should focus on that and not on swinging hammers! The others could split up their roles from taking on hitting different parts of the site, or one can focus on paint and the other on smashing. Whatever your action is, make sure you've thought through who is doing what to make the action as efficient and quick as possible.

Make the action as quick as possible, whilst making your action effective! This is one of the key reasons its so crucial to plan your action well, so everyone knows what they're doing.

### EQUIPMENT

Now you've got your plan down to a T, it's time to get equipped. On this point, it's a good idea to remember that CASH IS KING. When buying equipment, whether it's spray paints or sledgehammers, don't leave a paper (or digital) trail. Use cash and wear a baseball cap in the store and/or a face covering, just for extra measure. Obviously, you're going need the tools to conduct your action. These may include spray paints, making a fire extinguisher (check out our guide) and sledgehammers. It's important to remember when using sledgehammers, to get some cut safety gloves (YOU DON'T WANT TO GET CUT AND YOU DON'T WANT TO LEAVE YOUR BLOOD ON THE SITE EITHER!). Now, those items are crucial for the action. But here's how to remain undetected.

## **MAKE SURE:**

### A FACE COVERING IS KEY

Do not have your face on show at any point during the action. Balaclava is best for this. This might seem predantic, but cops are obsessed with trainers. Don't wear shoes that you've worn when arrested on an action or at a protest, or that are all over your social media. Best thing is to get the most plain boring black shoes and to only wear them when taking action.

(BLACK IS BEST)

(BLACK IDEALLY)

(THIS MAKES IT HARDER TO SUSS OUT YOUR BODY TYPE)

### YOUR WHOLE BODY IS COVERED

This is especially important if you have any 'identifying features such as tattoos or birthmarks on show. Therefore make sure you have gloves as mentioned above and everything is covered up.

\*WHEN TAKING ACTION, NEVER LEAVE ANYTHING BEHIND. ABSOLUTELY NOTHING APART FROM PAINT AND DESTRUCTION. THE POLICE MAY TRY TO FORENSICALLY ANALYSE ANY ITEMS WHICH ARE LEFT, SO DON'T LEAVE ANYTHING.\*

**DOCUMENTING YOUR ACTION** 

### RECORD

Now you've got your underground fashion sorted. Let's move on to how you're going to capture your action. The most crucial aspect of taking action is to tarnish your target and apply pressure. However, do not underestimate the power of capturing your action on camera so it can reach beyond the target. This means every other target can see what's happened, and more imporantly the people of Palestine know we're active in our solidarity.

### DO NOT

ever take your own personal phone on an action. But, if you're thinking about how to capture your action by video/ pictures, then it's worth getting a burner smart phone. You don't need to spend £100s on this. You can get some really cheap ones from second hand shops. Lycamobile sim cards tend to be best, as you can buy a top up from any shop (using cash), and then add credit to it without needing to register. <u>Remember</u> when using a lycamobile sim card, after you've added a top up, to add a plan to it immediately. You can search online how to do this. But this saves you a lot of money!

### ONCE YOU'VE GOT YOUR BURNER SMART PHONE.

It's wise to have a dropbox account set up on the phone. You can set once up using a protonmail email address, which you can easily create for free on **Proton** 

Make sure someone else who is in your cell but not on the action has access to this account, just incase. Also remember to check the dropbox account is working! Capturing your action on camera does not mean compromising yourself. If a video is taken, you can edit out any part which reveals identities. If you do not managed to do this successfully, Palestine Action will make sure to check videos for anything that can be used against you and remove it before posting it.

### You can send in videos/images of your action to: ACTIONS@PALESTINEACTION.ORG

For extra security measure, you can also remove the "exif data" from your pictures before sending them in. This is basically all the data that is stored in pictures which can have some identifiable information. It's really easy to remove this. You can use the website https://www.verexif.com/en/

If you forget to do this, Palestine Action will remove the exif data before posting. \*See our technology page for more information\*

SAFE MEETING PLACE AFTER ACTION

### WHAT IF IT ALL GOES PEAR SHAPED?

Prepare a "safe" meeting place if you all have to split up and scarper! This should be far enough away from the site to be safe, but not too far away that it would take too long. You should agree a length of time you would wait there until those who've arrived at the meeting place leave.

Now even though you're planning to get away, you must be prepared and take into account the risk of getting caught. You can do everything possible to minimise this, but this is a very real possibility. Make sure that your cell is aware of the potential legal consequences. This will obviously be dependent on the action you take and that's why it's important you do your own research on this.

We recommend using Kelly's solicitors if you do end up hed.

- Kelly Brighton
- Hodge Jone
- Allen London

They'll ask for your authority to liase with Palestine Action's support team. If you do allow this, it means we can arrange police station support and keep you in touch with our dedicated support team throughout your legal process.

Adrenaline and nerves will be pumping through you at the same time. This is normal. Make sure you run through your plans right before taking action another time, to make sure everyone is on the same page. Then go for it.

THE DAY HAS COME, YOUR ACTION IS PLANNED, You're all equipped and ready to go.

# GOOD LUCK!

You've just sabotaged a complicit company. At this point, you want to make sure to

## **DESTROY ALL EVIDENCE.**

If you've got empty spray cans or any other items left, get

them out as soon as possible. Don't put them in your recycling bins, find a communal or other place to throw them away. If you don't want to get rid of your underground attire, make sure they're not in your place or your car. Take them to a friend's place. This might seem over the top but the best peace of mind and finale to an action is knowing there is no evidence left behind at the site, or in your home. If the police ever get as far as searching your home (which is very unlikely if you follow all the above steps), they'll search for any items which connect you to that action.

### **REMEMBER TO:**

- Get the pictures off the burner smart phone
- Remove the exif data from any pictures verexif
- Edit out any identifiable points in video footage (voices or faces)
- Send them into actions@palestineaction.org

Along with the footage, you can add your own communique, which Palestine Action will publish alongside your action.

# **STEP 7 TECHNOLOGY** CHECKLIST

### **KEY INFORMATION TO FIND OUT**

### WHERE POSSIBLE, DON'T USE PHONES OR COMPUTERS

### ARRANGING MEETINGS

Use Signal with disappearing messages on. Put phones in a Faraday cage or microwave in another room.

### **USE TOR FOR ONLINE RESEARCH**

### STAY CLEAN

Delete everything you don't need like photos and research files.

### USE A BURNER SMART PHONE FOR MEDIA

### **USE A VPN**

Although this is not necessary when you are using Tor, a VPN will obscure where you are connecting from so you are less identifiable by the websites you are using. Good VPNs to use are:

#### - ProtonVPN (free)

- MulivadVPN (paid, can pay cash)

### HOW TO SET UP SIGNAL WITH A BURNER NUMBER

- 1 INSTALL SIGNAL ON YOUR REGULAR PHONE
- 2 BUY OR USE ANOTHER PHONE (E.G. A CHEAP BRICK PHONE) WITH A SIM ALL BOUGHT IN CASH
- 3 WHEN REGISTERING FOR SIGNAL, SET UP AN ACCOUNT Using the number on the Burner Phone
- 4 TAKE THE ACTIVATION CODE FROM THE BURNER PHONE And enter it in the first one
- 5 YOU CAN NOW TURN OFF AND NOT USE THE BURNER PHONE
- 6 USE SESSION FOR MESSAGING IF YOU WOULD NOT LIKE A PHONE NUMBER ASSOCIATED
- 7 USE PROTONMAIL AND CREATE A COMPLEX PASSWORD: www.xkpasswd.net/s/

# STEP 7 SECURITY

**SECURITY GUIDE** 

We could write a whole book on this subject. But hey, firstly it would be out of date by the time we wrote it with the rapid change of specially digital security , and second plenty of other clever folks have so we provide some trusted sources here for you to check and re check. One thing about your underground cell is you don't need to worry or engage in recruitment once it's formed and therefore it is somewhat easier to put in place higher level security procedures that you need. Digital security is vital but it should not be at the detriment of basic security! Bragging, gossiping and loose words generally are often how things become undone and that sort of behaviour should be avoided and called out if you some

across it in your cell. In addition to the advice contained in the guides below you should also adopt some simple and sensible precautions of your own. The most well known, as oftentimes forgotten is you should not have your phone with you in any meeting your cell has. Ideally you would arrange meetings via signal messenger (be sure to enable disappearing messages) and then not take your phone. Also all members of your cell should invest in a faraday cage for your phone (you can pick them up for £20-£30). These block all communications to your phone and in effect if used properly you "go dark" for the duration the phone is in the faraday cage (its called a cage but most look like oversized wallets!)

### WHAT IS A VPN?

"A VPN, or virtual private network, is a technology that establishes a secure tunnel between two or more devices. An Internet VPN, such as **Mullvad**, offers a tunnel between you and the Internet, allowing you to browse the web securely and privately, even when using a public WiFi network at a cafe or hotel."

### CRYPTPAD

Use CryptPad to store any collaborative research documents, if you have too. On cryptpad, add passwords to your files and set expiry (destruction) dates for after your action if you don't need it beyond then.

Protonmail is an end to end encrypted email. This means that only you and the people who you email (e.g. action@palestineaction.org) are the ones that can see your email content.

However, if the Swiss courts request data from protonmail (which can be done via Europol) protonmail may provide them with IP address information (basically, where you logged in from). If you use a VPN every time you log into the address, then this means protonmail never gets access to an IP address that is linked to you and you are much safer. Although services like riseup.net are run by people more politically aligned, that doesn't necessarily mean they are better. Organisations like RiseUp and smaller and less well resourced than protonmail.

#### Just use protonmail and be careful.

"We know by the nature of technology and digital security this information will go out of date quickly. We welcome constructive suggestions about changes to this part of the guide just email info@palestineaction.org (or whatever)"

# Palestine Action Spray Red Paint Over Bomb Factory Teledyne e2v on Student Open Day

Teledyne e2V in Chelmsford Essex, a part of the Teledyne Technologies Group the largest supplier of weapons from Britain to the Israeli regime [1], opened its doors to students on 28th September 2023 as a recruitment drive to coincide with National Manufacturing Day [2]. Palestine Action joined the 'open day' event disguised, to make prospective students thinking of working there, fully aware of the company's murderous operations.

Spraying red paint from fire extinguishers over the entrance, students applying to join Teledyne's workforce, or considering the "opportunities" being advertised inside, would have been quickly made aware that a job in this industry leaves you with 'blood on your hands'.

The action was an embarrassment for the firm, who despite their efforts, had no students turn up to their open day and failed to hide their business of war using glossy presentations, attractive pension plans and life insurance schemes, in an attempt to attract new young employees without explaining the whole story. Their 'e2v' factory specialises in detonators used in a wide range of weapons including missiles, bombs and sea mines [3] [4].

Last December, four Welsh activists took direct action at the Teledyne Labtech factory in the small rural border town of Presteigne, rendering the factory inoperable and causing substantial damage — the action to close the factory, which was a success, incurred lengthy custodial sentences. The police alleged hundreds of thousands of pounds of damage was caused, despite that cost being incomparable to the Palestinian lives destroyed by Teledyne's weaponry [5]

Today's action serves to remind war mongers hiding behind state of the art premises, that wherever you are and no matter how hard you try to shield the truth from the public, Palestine Action won't allow your 'business of bloodshed' to operate without consequences. There are no benefits to working in the war industry — there are only lives torn apart.

According to a senior Teledyne manager, contamination of their clean rooms could stop production for up to 12 months.

Actionists just got through to the clean room for Israel's F-35 fighter jet parts.

### Palestine Action 🤣 @Pal\_action · Oct 2

Contamination of this clean room will cause severe disruption to the production of Israel's F-35 fighter jet components.

When our government fails to abide by their legal duty to end complicity in genocide, it's up to ordinary people to take action.
